

!! IMPORTANT NOTICE !!

ELECTRICAL CONTRACTORS & DESIGN PROFESSIONALS

Beginning September 14th 2026 all Applications for Electrical Plan Review, Residential Load Calculations, and Electrical Permits will be submitted through the new CAGIS system. The IBI website will be updated with the appropriate links to direct you before that time.

Prior to our transition to the new system, we will be offering four training sessions at IBI (in the conference room next door to our front counter). These training sessions will guide your permitting and submittal staffs through the steps required to submit for Electrical Plan Review, Residential Load Calculations, and Electrical Permits in the new system.

Training Sessions are as follows:

September 8th 9:00AM to 11:00AM

September 8th 12:30PM to 2:30PM

September 10th 9:00AM to 11:00AM

September 10th 12:30PM to 2:30PM

We strongly recommend you send your permitting and submittal staffs to one of these training sessions.

Please let us know which one you will be attending. To reserve your place email Sherry Gangloff at Sgangloff@inspectionbureau.com.

Thank you!

Gaylord Poe
